

WHEN YOU'RE A RANCHER SIMPLE IS ALWAYS A GOOD ROAD TO TRAVEL....

SPECIAL FEATURES

After years of good old-fashioned cowboy design development, the Ramrod BumpGate is now the most practical ranch and range gate on the market.

Our gate is built for the working rancher who requires livestock-secure gates. Ramrod provides fast and easy passage and best of all, you never have to get out of the truck!

Drive up to the Ramrod BumpGate and gently bump it. The gate swings open and gravity swings it securely closed. Simple as that! No electricity! No solar power!

Ramrod is so efficient we'll guarantee it'll be the most used and reliable piece of equipment on your ranch!

- Affordable-No costly electrical or solar components.
- Incredibly Reliable.

- Easy bolt-up installation
- No welding necessary for installation
- Lockable
- Delay unit available for narrow roadways and longer loads
- Constructed heavy duty to last. Satisfaction Guaranteed!
- NEW-High security, solar powered remote control system!

PROVEN PERFORMANCE

The Ramrod BumpGate is a revolutionary gate system designed to save you valuable time, energy and frustration. Ramrod is a vehicle actuated gate and is easily operated by gently bumping a uniquely designed bumper bar which releases and opens the gate automatically. It doesn't get much simpler than that!

TRUST YOUR GATE

The use of cattleguards has proven marginal for livestock security. Cattle & horses are notorious for picking & jumping their way across cattleguards. This often results in costly injuries and the loss of valuable livestock. The casual intruder finds no deterrent with a cattleguard. And many livestock escape through open gates. But now there is an effective alternative. The use of Ramrod BumpGates can bring peace of mind to the rancher & farmer by keeping livestock in, intruders out and the gate securely closed.

Ramrod BumpGate...A Rancher's Dream Come True!
