

RAMROD...SIMPLY THE BEST AUTOMATIC RANCH GATE BUILT...ANYWHERE

RAMROD BUMPGATE IS JUST PLAIN SIMPLE TO USE.....

- 1.) Drive up to the Ramrod BumpGate slowly, (1-2 mph) from either direction. Gently bump the A-shaped bumper assembly in center of gate with vehicle bumper.
- 2.) Allow Ramrod to swing freely open and then pass through with no delay.
- 3.) Ramrod will slowly return within about 10-12 seconds and latch securely.

RAMROD BUMPGATES can be operated by all types of vehicles; trucks, compacts, family wagons, imports, stock equipment and even trucks with trailers!

RAMROD IS ONE TOUGH GATE!

Our standard and most recommended ranch gate measures 14' by 4'9" with a working height of 5'4". Our heavy duty Bison gate measures 16' by 5'4" with a working height of 6'. All gates are constructed of heavy duty steel and U.S. made components. Ramrod BumpGate is tough, practical and it's incredibly reliable. Heck, it even looks good! Ramrod was designed for rugged use in all terrains, offering years of satisfaction with minimal maintenance.

Each gate unit is shipped complete and ready to install. The kit includes and HD Black Steel Main Frame, Bumper Unit, Safety System, Cable Return System, Receiver, Stabilizers, all hardware necessary, Parts List and installation manual.

Material Needed: Hinge pole, receiver pole and stabilizer bar for mounting gate are sold separately. They can also be purchased from a local steel or pipe supplier. Two 21' by 4" std blk pipe and one 21' by 1 1/2" std blk pipe.
